---

## Summary

Staff Engineer and Cloud Solutions Architect with 20 years of experience designing and delivering scalable web platforms across full-stack systems (React, Node.js, PHP, MySQL) and enterprise CMS ecosystems.

Recognized for leading complex initiatives in high-pressure, high-ambiguity environments, navigating evolving requirements, modernizing legacy systems, and delivering against immovable launch timelines. I specialize in transforming technical complexity into systems that are intuitive for users and operationally reliable for teams.

In recent years, my focus has centered on edge-first architectures, particularly leveraging Cloudflare Workers as the primary application layer. In this model, Cloudflare functions not merely as a CDN, but as an integral backend platform, powering routing, caching strategies, security enforcement, and distributed data access patterns.

## Core Strengths

- \* Edge-first architecture (Cloudflare Workers, cache.default, KV, R2, D1, Durable Objects, Queues)
- \* Performance, caching strategy, and production stability
- \* Multi-tenant / multi-domain platforms with shared components and site-specific branding
- \* Secure authentication flows (SSO patterns, email OTP, session validation, admin-only routes)
- \* Headless WordPress + Next.js ecosystems (including WordPress VIP)
- \* Elasticsearch indexing pipelines and large-scale content/data synchronization
- \* AI-assisted workflows (Cursor-style copilots, Claude/GPT, structured prompting, automation)
- \* Mentorship, engineering standards, and calm execution under launch pressure

## Technical Skills

### Edge / Cloud Platforms

Cloudflare Workers, Durable Objects, KV, D1, R2, Queues, cache.default, WAF, Zero Trust, DNS, CDN caching

### Frontend

React, Next.js, JavaScript (ES6+), HTML, CSS, Tailwind CSS

### Backend / CMS

WordPress (VIP), PHP, Gutenberg Blocks, WP-CLI, REST APIs, Headless WordPress, Node.js

### Data / Search / Infra

MySQL, Elasticsearch, ElasticPress, indexing pipelines, data sync workflows, CI/CD (GitHub Actions), Nginx

### AI-Assisted Engineering

Cursor, Claude, GPT, structured prompting, automation workflows

## Experience

### **Staff Engineer @ Fueled | Roseville, California | Jul 2024 - Present**

Staff Engineer in the WordPress practice (10up merged with Fueled in 2023). I partner with enterprise clients to design and deliver full-stack platforms across WordPress VIP, headless architectures, React/Node services, and modern edge-first infrastructure.

Key focus areas include platform architecture, performance and caching strategy, secure integrations, and scalable editorial workflows. I'm frequently brought in for high-complexity work: multi-domain systems, large-scale content ecosystems, launch readiness, and production stability.

I also mentor engineers across teams, help unblock delivery, and raise standards around maintainability, reliability, and "boring-to-operate" systems.

### **Associate Director of Engineering @ Fueled | Roseville, California | Jul 2022 - Jul 2024**

Led engineering delivery across multiple concurrent client engagements, balancing technical execution, quality, and team health. Served as a technical leader and strategic partner to stakeholders - translating ambiguous requirements into clear plans and scalable solutions.

Focused heavily on:

- \* Mentorship and onboarding for engineers and tech leads
- \* Improving delivery processes and team consistency
- \* Architecture guidance across WordPress, React, Node, and cloud systems
- \* Helping teams ship under pressure while keeping quality high

### **Lead Web Engineer @ Fueled | Roseville, California | Oct 2019 - Jul 2022**

- \* Partnered directly with stakeholders, providing confident technical leadership and clear delivery direction.
- \* Led engineers through complex builds, keeping teams aligned, supported, and shipping confidently.

### **Senior Web Engineer @ Fueled | Roseville, California | Jun 2018 - Oct 2019**

Tech lead for complex web builds across WordPress, custom integrations, and modern frontend systems. Partnered closely with stakeholders to ensure projects were technically sound, clearly scoped, and delivered with confidence.

Recognized for:

- \* Strong client-facing engagement and communication
- \* Leading engineers through complex builds while keeping teams aligned and supported
- \* Advocating for solution quality and long-term maintainability
- \* Translating business needs into clear technical execution plans

### **VP of Technology @ Three29 | Sacramento, California | Mar 2013 - Jun 2018**

Led the company's technology strategy and execution, overseeing the development of mission-critical client platforms and internal systems aligned with long-term business goals.

During this period, I helped scale both delivery and the team — supporting rapid growth while improving consistency, quality, and throughput.

#### Key contributions:

- \* Owned technology planning and delivery across a high-volume portfolio, completing 50+ projects for 30+ clients in a single year
- \* Provided technical leadership and direction for the development team across multiple concurrent engagements
- \* Built internal processes, tooling, and engineering standards to increase productivity and reduce delivery risk
- \* Developed onboarding and training programs, hired and mentored engineers, and supported managers to grow team effectiveness

#### **Senior Web Developer @ iHouseweb, Inc** | Davis, California | Feb 2011 - Apr 2013

- \* Design architecture and develop web applications
- \* Maintain and develop new features for the company's real estate product
- \* Develop marketing tools, Facebook apps and WordPress plugins

#### **Web Consultant @ Three29 Media** | Sacramento, California | Aug 2010 - Apr 2013

- \* Project planning, software architecture design and development
- \* Implementing in-house CMS and ecommerce solutions
- \* Developing custom modules/plugins for Magento/WordPress/ ExpressionEngine
- \* Developed a web application for APNS

#### **Senior Web Developer @ Gemini Solutions** | Redwood City, California | Mar 2008 - Aug 2010

- \* Project planning and task management
- \* Software architecture design and development
- \* Developing advertising backend application (similar to Adwords) and social networks applications (Facebook/MySpace)

#### **Web Consultant @ SisleyStudio** | Bucharest, Romania | Jan 2006 - Jun 2010

- \* Project planning, software architecture design and development
- \* Implementing in-house CMS, ecommerce solutions, coding real estate and price comparison applications

#### **PHP Web Developer @ CHML Web Services** | Bucharest, Romania | Feb 2006 - Mar 2008

- \* Web development for various applications/solutions as CMS, ecommerce, online booking, accounting and insurance, HR evaluation
- \* Network set-up and maintenance, server-end applications

## Education

#### **University of Bucharest**

B.S., Computer Science (2006 – 2010)

#### **Politechnica University of Bucharest**

B.S., Artificial Intelligence and Electronic Engineering (2003 – 2006)
